3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity

#### What are the key risks that are specific to the securities?

#### Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

##### 1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and whether knock-in or knock out features apply. Auto-callable Products include automatic early redemption mechanisms. Depending on the applicable formula, if an automatic early redemption event occurs investors may be exposed to a partial loss of their investment. Investors may be exposed to a partial or total loss of their investment.

##### 2. Risks related to the underlying and its disruption and adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment.

Exposure to shares, similar market risks to a direct investment in an equity, potential adjustment events or extraordinary events and market disruption or failure to open an exchange may have an adverse effect on the value and liquidity of the Securities.

##### 3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

##### 4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

#### Hva er de viktigste risikoene som er spesifikke for verdipapirene?

#### De fleste materielle risikofaktorene som er spesifikke for verdipapirene

Det er også risiko forbundet med verdipapirene, inkludert:

#### 1. Risiko tilknyttet verdipapirenes struktur:

Avkastning på Verdipapirene avhenger av ytelsen til den/de Underliggende referansen(e) og om knock-in eller knock out-funksjoner gjelder. Produkter som inkluderer automatiske innløsning inkluderer automatiske mekanismer for tidlig innløsning. Avhengig av gjeldende formel, kan investorer bli utsatt for delvis tap av investeringen hvis en automatisk hendelse med tidlig innløsning inntreffer. Investorer kan bli utsatt for et totalt eller delvis tap av investeringen.

#### 2. Risikoer i tilknytning til de underliggende instrumentene og dets forstyrrelser og justeringer:

Til forskjell fra en direkteinvestering i Aksje(r), "Stapled Share(s)" og/eller Depotbevis (GDR, ADR) som utgjør de(n) Underliggende Referansen(e) (i fellesskap, "Aksjen(e)"), en investering i Instrumentene gir ikke Innehaveren rett til å stemme eller motta utbytte eller utdelinger fra de Underliggende (med mindre det er spesifisert i Endelige Vilkår). Som en følge av dette vil avkastningen på Instrumentene ikke være den samme som en direkteinvestering i de relevante Aksjen(e) og kan være lavere enn en direkteinvestering. Eksponering mot aksjer, lignende markedsrisiko til en direkteinvestering i et egenkapitalinstrument, mulige justeringshendelser og ekstraordinære hendelser og markedsforstyrrelser eller manglende åpning av en markeds plass kan ha en negativ effekt på verdien og likviditeten til Instrumentene.

#### 3. Risiko tilknyttet handelsmarkedene for verdipapirene:

Handelsprisen på Verdipapirene kan påvirkes av en rekke faktorer, inkludert, men ikke begrenset til, den relevante prisen, verdien eller nivået på den/de Underliggende referansen(e), gjenværende tid til planlagt innløsningsdato for Verdipapirene, den faktiske eller underforståtte volatilitet assosiert med Underliggende referanse(r) og korrelasjonsrisiko for relevante Underliggende referanse(r). Muligheten for at verdien og handelsprisen på Verdipapirene vil svinge (enten positivt eller negativt) avhenger av en rekke faktorer, som investorer bør vurdere nøye før de kjøper eller selger Verdipapirene.

#### 4. Juridisk risiko:

Vilkårene i Verdipapirene vil inneholde bestemmelser for innkalling til møter til innehavere av slike Verdipapirer for å vurdere saker som generelt berører deres interesser. Disse bestemmelsene tillater et definert flertall å binde alle innehavere, inkludert innehavere som ikke deltok og stemte på det aktuelle møtet, og innehavere som stemte på en måte som var i strid med flertallet.
