9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Calculation Amount per Certificate is SEK 10,000, the Aggregate Nominal Amount is SEK 100,000,000 and the Issue Price is 100 per cent. (100%) of the Aggregate Nominal Amount; and
- (ii) in respect of each Underlying Asset, the Trigger Level is 80 per cent. (80%) of the Asset Initial Price of such Underlying Asset and the Barrier Level is 50 per cent. (50%) of the Asset Initial Price of such Underlying Asset.

For the purposes of these Examples only, (i) the Trigger Floor is deemed to be SEK 18,000, and (ii) the Redemption Percentage is deemed to be 140 per cent. (140%). The actual Trigger Floor and the Redemption Percentage will each be determined by the Calculation Agent on or around February 17, 2022 and, in respect of (i) the Trigger Floor, may be a lesser or greater amount than SEK 18,000 (but shall not be less than SEK 17,000), and (ii) the Redemption Percentage, may be a lesser or greater percentage than 140 per cent. (140%) (but shall not be less than 135 per cent. (135%)). Therefore, as the actual Trigger Floor and Redemption Percentage may each be lower than the deemed values used for the purposes of these Examples, the actual amounts received by investors may be less than the amounts stated in the Examples below.

SETTLEMENT AMOUNT

Example 1 – positive scenario: *The Final Closing Price of each Underlying Asset is 80 per cent. (80%) or more of its respective Asset Initial Price and the Trigger Perf is deemed to be 3.00.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Trigger Perf, provided that such amount shall not be less than the Trigger Floor, i.e., SEK 30,000.

Example 2 – positive scenario: *The Final Closing Price of each Underlying Asset is 80 per cent. (80%) or more of its respective Asset Initial Price and the Trigger Perf is deemed to be 1.70.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Trigger Perf, provided that such amount shall not be less than the Trigger Floor, i.e., SEK 18,000.

Example 3 – positive scenario: *The Final Closing Price of each Underlying Asset is 80 per cent. (80%) or more of its respective Asset Initial Price and the Trigger Perf is deemed to be 1.00.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Trigger Perf, provided that such amount shall not be less than the Trigger Floor, i.e., SEK 18,000.

Example 4 – positive scenario: *The Final Closing Price of one Underlying Asset is 79 per cent. (79%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 50 per cent. (50%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency

equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Redemption Percentage, i.e., SEK 14,000.

Example 5 – negative scenario: *The Final Closing Price of one Underlying Asset is 49 per cent. (49%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 50 per cent. (50%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) 100 per cent. (100%) of the Initial Closing Price of the Final Worst Performing Asset, i.e., SEK 4,900. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount invested in the Certificates.**

Example 6 – negative scenario: *The Final Closing Price of one Underlying Asset is zero per cent. (0%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 50 per cent. (50%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) 100 per cent. (100%) of the Initial Closing Price of the Final Worst Performing Asset, i.e., zero. **In this Example, an investor will sustain a total loss of the amount invested in the Certificates.**

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets,

concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.

- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Nasdaq Stockholm AB with effect from at the earliest the Issue Date.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets. Therefore, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any Underlying Asset fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any settlement amount, you could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of one or more Underlying Assets. The price of an Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of an Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of an Underlying Asset as indicative of the range of, or trends in, fluctuations in such Underlying Asset that may occur in the future. An Underlying Asset may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.

- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.

Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.

Vilka nyckelrisker är specifika för Värdepapperen?

Risikfaktorer förknippade med Värdepapperen: Värdepapperen är föremål för följande nyckelrisker:

Värdet och den kvoterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för de Underliggande Tillgångarna kan du förlora delar av eller hela din investering

Risker relaterade till vissa funktioner i Värdepapperen:

- Villkoren för Dina Värdepapper föreskriver att avkastningen på Värdepapperen är beroende av ”sämsta-av utvecklingen för korgen av Underliggande Tillgångar. Därför kommer du att exponeras mot utvecklingen för varje Underliggande Tillgång och, i synnerhet, mot den Underliggande Tillgång som har sämst utveckling. Detta innebär att, oberoende av hur den andra Underliggande Tillgången utvecklas, om en eller fler Underliggande Tillgångar misslyckas med att uppnå en relevant tröskel eller barriär för betalning av ränta eller beräkning av vilket avvecklingsbelopp som helst, kan du förlora delar av eller hela din initiala investering.

Risker relaterade till de Underliggande Tillgångarna:

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de Underliggande Tillgångarna:* Avkastningen på dina Värdepapper kan vara beroende av utvecklingen för en eller fler av de Underliggande Tillgångarna. Kursen för en Underliggande Tillgång kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som ”volatilitet”. Volatiliteten för en Underliggande Tillgång kan påverkas av nationella och internationella finansiella, politiska, militära eller ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av kursen för en Underliggande Tillgång, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.
- *Historisk utveckling för en Underliggande Tillgång indikerar inte framtida utveckling:* Du ska inte se någon information om historisk utveckling för en Underliggande Tillgång som en indikation på omfattningen av, eller trender för, fluktuationer i sådan Underliggande Tillgång som kan inträffa i framtiden. En Underliggande Tillgång kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet på och avkastningen från dina Värdepapper.
- Aktiernas utveckling är beroende av makroekonomiska faktorer, såsom ränta och prisnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer såväl som företags-specifika faktorer som vinstposition, marknadsposition, riskläge, aktieägare struktur- och distributionspolicy samt affärsrisker som emittenterna står inför. Vilken som helst eller en kombination av sådana faktorer kan påverka utvecklingen för de Underliggande Tillgångarna som i sin tur skulle ha en negativ effekt på värdet på och avkastningen från dina Värdepapper.
